

MARGARET RIVER UNDERWATER HOCKEY CLUB

The game of underwater hockey is a great team sport for people of all ages, shapes and sizes, and causes very few injuries. Played on the pool floor between two teams, the aim is to score a goal by pushing a lead puck with a small bat. The game is physically challenging, but be warned, it is highly addictive!

The Margaret River Underwater Hockey Club caters for juniors and seniors in this strong aquatic sport of the region. The club has produced both State and National male, female and junior representatives. Any person wishing to participate in this sport can attend the club's sessions as listed below.
